

REMARKS/ARGUMENT

This application is a continuation of US Ser. No. 09/770,336. The amendment to the specification is made so that the relationship to the parent case is recited in the specification.

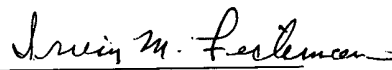

The claims have been amended to place the independent claims generally in the form that has been allowed in parent case 09/770,336 except that (a) the requirement that the fluoride donor be substantially saturated (in the parent case) is omitted here and (b) the wetting agent is not limited.

Respectfully submitted,

Date: October 22, 2003
